講義の目的 In this course, students will have opportunities to conduct group works. In each class, we try to form several mixed-groups of Japanese students and international students to discuss about different types of issues and topics. The purpose of this course is to enhance the ability to persuade people who have different cultural backgrounds to understand and conclude your team resolution. The course will be taught mainly in English, but we may ask students to use Japanese and non-verbal communication for a group work.
