

●Research Interests

(1) Productivity and efficiency analysis, (2) Econometric analysis of public utility industries, (3) Econometric analysis of higher education institutions, (4) Econometric analysis of energy industries, (5) Empirical studies on environmental emissions, (6) Input and output analysis, (7) Macroeconometric model and CGE

●Outline of Seminar for Graduate Students

The seminar is composed of participant's presentation and discussion on their own research topics. The working language is mainly Japanese but presentation in English is acceptable.

●Profile

1982 MA in Economics, Nagoya University

1985-91 Assistant Professor, Lecturer, School of Economics, Nagoya University

1992-2004 Associate Professor, School of Economics, Nagoya University

1996 Ph.D. in economics, Nagoya University

2005-Present Professor, Nagoya University

●Publications

1. "Scale Economies and Over-Capitalization in Japanese Electric Utilities," (with S.Madona and Y.Nakanishi) International Economic Review 34, 1993, 431-440.

●Research Interests

I major in the history of economic thought, focusing on theories of Keynes and Kalecki. I am also interested in the recent development of radical political economy, such as Post Keynesian economics, American radical economics and French regulation theory.

●Outline of Seminar for Graduate Students

Participants strive for acquisition of basic knowledge and grasp of the recent research trend through the reading of many literature on the making and development of modern political economy. Reports and discussions are performed, basing on each of the participants' subject of research.

●Profile

1963 Born in Kagoshima

1987 Graduated from Social Science Major, School of Education, Waseda University

1993 Completed Doctoral Course of Graduate School of Economics, Hitotsubashi University

1993-94 Research Associate, School of Economics, Hitotsubashi University

1994-95 Research Associate, School of Economics, Nagoya University

1995-97 Assistant Professor, Faculty of Economics, Toyama University

1997-2004 Associate Professor, Faculty of Economics, Toyama University

2004-05 Associate Professor, School of Economics, Nagoya University

2005-Present Professor, School of Economics, Nagoya University

●Research Interests

- (1) Macroeconomics, Monetary Economics, and Labor Economics
- (2) Search Theory
- (3) Economics of Information, Learning, and Expectations
- (4) Japanese Economy

●Outline of Seminar for Graduate Students

Participants are expected to present their own research. First-year graduate students are asked to present some leading research articles in the fields of macroeconomics, monetary economics, and labor economics. Second-year graduate students are expected to find their own search topics, and build their research plans for master's theses. Students in the doctoral program are expected to work with the instructor on some specific research topics and complete research papers as well as their doctoral theses.

● Research Interests

- Social history of Science (both natural sciences and social sciences) in the 18-19th century of Europe
- Enlightenment social thought in Europe (especially in France)
- Intellectual history of Science, Technology and Innovation policy.
- Gender, sexuality, Science and technology

● Outline of Seminar for Graduate Students

History of social sciences is a relatively new field. It covers histories of various fields such as economics, sociology, law, anthropology, social thought and so on. The aim of this seminar is to introduce you to this new field, and to make you familiar with the way to apply historical thinking to social sciences themselves.

For that purpose, the seminar puts emphasis on understanding of methodology for history of social sciences or that of social thought. Students read primary sources related to their own research subject, and secondary sources recommended by the professor.

● Profile

1998	Bachelor (Arts and Sciences), University of Tokyo, Tokyo (Japan)
2000	Master (Arts and Sciences), University of Tokyo Graduate School of Arts and Sciences, Tokyo (Japan)
2002	D.E.A. [equivalent to Master's degree], Ecole des Hautes Etudes en Sciences Sociales, Paris (France)
2008	Ph.D. (Arts and Sciences), University of Tokyo, Graduate School of Arts and Sciences, Tokyo (Japan)
2009	Global Center of Excellence Researcher, Tamagawa University, Brain Science Institute,
2010	Associate Professor, Hiroshima University, Graduate School of Integrated Arts and Sciences
2016	Professor, Nagoya University, Graduate School of Economics

●Research Interests

Structure and architecture of manufacturing systems

Optimization of process plans and schedules

Modeling of social systems

●Outline of Seminar for Graduate Students

Manufacturing of industrial products is one of key activity to sustain our social systems. It is important to understand both structure and architecture of the systems in order to maintain and improve their performance. In the seminar, the theoretical and mathematical approaches are adopted to construct ideal manufacturing systems for the near future society.

In the master course, fundamental techniques such as mathematical programming are studied to examine the performance of the modern manufacturing systems. Modeling and evaluations are main issues in the seminar.

In the doctoral course, A new production model is to be constructed in order to propose an original framework for the next generation of manufacturing systems. The validations and verification of the proposed systems are required to show the originality. An expansion to manage the social system is also one of the important issues in the Seminar.

●Research Interests

(1) Knowledge management

My interests are on how to manage an individual's or organization's knowledge to achieve high performance.

(2) Other management issues in an organization

Topics I have already carried out range from product development to service management.

●Profile

- 1991-1996 Employed by Sony Corporation (as an engineer)
- 2001 Master's Degree in Knowledge Science
- 2004 Doctoral Degree in Knowledge Science
- 2004-2008 Assistant Professor at Japan Advanced Institute of Science and Technology
- 2008-2010 Project Associate Professor at The University of Tokyo
- 2010-2013 Associate Professor at Okayama University
- 2013-2016 Associate Professor at Nagoya University
- 2016- Professor at Nagoya University

●Research Interests

- (1) Inter-firm management control systems
- (2) Management control systems
- (3) Capital budgeting

●Outline of Seminar for Graduate Students

Participants are required to present their own research.

●Profile

- 1995 Bachelor of Business Administration, Ritsumeikan University
- 1997 Master of Business Administration, Ritsumeikan University
- 2000 Master of Business Administration, Kobe University
- 2003 Doctor of Business Administration, Kobe University
- 2003 Lecturer, Faculty of Economics, Kanto Gakuen University
- 2005 Assistant Professor, Faculty of Economics, Kanto Gakuen University
- 2006 Assistant Professor, Graduate School of Accountancy, Kansai University
- 2007 Associate Professor, Graduate School of Accountancy, Kansai University
- 2012 Professor, Graduate School of Accountancy, Kansai University
- 2017 –Present Professor, Graduate School of Economics, Nagoya University

●Publications

Periodicals (written in English)

“Contracting abroad: A comparative analysis of contract design in host and home country outsourcing relations” *Management Accounting Research*, Vol. 40 (2018), (co-authored with Henri C. Dekker and Takaharu Kawai).

“Beyond the contract: Managing risk in supply chain relations” *Management Accounting Research*, Vol. 24 No.2 (2013), pp.122-139 (co-authored with Henri C. Dekker and Takaharu Kawai).

“Transition of buyer-supplier relationships in Japan: Empirical evidence from manufacturing companies” *Journal of Accounting and Organizational Change*, Vol. 9 No.4 (2013), pp.427-447 (co-authored with Takaharu Kawai and Nobumasa Shimizu).

Periodicals (written in Japanese)

“The design of inter-firm management control: Interrelations of contract dimensions” *Genkakeisan Kenkyu (Journal of Cost Accounting Research)*, Vol. 40 No. 1 (2016), pp.24-36.

“Management control frameworks and management accounting tools” *Genkakeisan Kenkyu (Journal of Cost Accounting Research)*, Vol. 40 No. 2 (2016), pp.125-138 (co-authored with Rie Yokota, Sakichi Otomasa, Takaharu Kawai, Yasushi Onishi and Takeyoshi Seno).

●Research Interests

(1) INDUSTRIAL ORGANIZATION; collusion, industry evolution (entry) and devolution (exit), price discrimination, auctions, consumer search, procurement (2) GAME THEORY; evolutionary games, repeated games, bargaining games, (3) CONTRACT THEORY; holdup problems, incomplete contracts, relational contracts, incomplete information, moral hazard

●Outline of Seminar for Graduate Students

The purpose of this seminar is twofold. First, we review academic papers and discuss related issues to find important open questions. Second, we discuss topics raised by participants toward completion of his/her master's or doctoral thesis. Active participation is strongly encouraged.

●Profile

Education: B.A. (Economics) Keio University (1994), M.A. (Economics) Keio University (1996), Ph.D. (Economics) University of Pennsylvania (2003).

Employment: Institute of Economic Research, Kyoto University, Lecturer (2003-6). Nagoya University, School of Economics, Lecturer (2006-7), Associate Professor (2007-2018), Professor (2018-)

●Publications

4. "Dynamic Entry and Exit with Uncertain Cost Positions." (with Huanxing Yang), *International Journal of Industrial Organization*, 27(3), pp. 474-487, 2009.
5. "Endogenous Product Boundary" *Manchester School*, 85(1) pp. 13-40, 2017, (with Takanori Adachi and Takeshi Ebina)
6. "Equity Bargaining with Common Value" *Economic Theory*, 65(2), pp. 251-292, 2018, (with Yasutora Watanabe)
7. "Is a Big Entrant a Threat to Incumbents? The Role of Demand Substitutability in Competition among the Big and the Small" *Journal of Industrial Economics*, 66(1), pp. 30-65, 2018 (with Lijun Pan)

●Research Interests

(1) Macroeconomics, (2) Financial economics, (3) Risk management, and (4) Disaster risks.

●Outline of Seminar for Graduate Students

Seminar participants are expected to choose one topic from macroeconomics and financial economics, and hopefully to combine theoretical investigation with empirical examination. In particular, a topic related to the past and current Japanese economy is quite welcome.

●Profile

B.A. in economics, Kyoto University, Japan, March, 1983.

Ph.D. in economics, Massachusetts Institute of Technology, June, 1992.

Researcher, Research Department, The Sumitomo Trust and Company, 1983-1987.

Assistant Professor, Department of Economics, The University of British Columbia, 1992-1995.

Associate Professor, Faculty of Economics, Kyoto University, 1995-1998.

Associate Professor, Graduate School of Economics, Osaka University, 1998-2001.

Professor, Graduate School of Economics, Hitotsubashi University, 2001-2019.

Professor, Graduate School of Economics, Nagoya University, 2019-present.

●Publications

●Research Interests

I am a health economist. I am interested in game theoretic analysis of strategic interaction among various players in health care, as well as in microeconomic analysis of the behavior of these players. My research interests include: strategic behavior of health care providers; *causal* evaluation of health policies; fertility behavior; determinants of body weight and eating behavior; business cycle and health.

●Outline of Seminar for Graduate Students

For the first-year graduate students, the emphasis is on understanding graduate-level microeconomics and econometrics, as well as learning key concepts of health economics. Specifically, exercise questions in microeconomics and econometrics textbooks will be assigned, and students will be asked to present the solutions to the class. First-year students will also present chapters from health economics textbooks. Second year students will conduct econometric analysis using Japanese health-related data and present their own research. Presentation in English is accepted.

●Research Interests

1. Public Capital and Economic Growth
2. Optimal Provision of Public Goods under Uncertainty
3. Debt Sustainability

●Outline of Seminar for Graduate Students

The seminar for Graduate Students deals with the basis of economic theory and major topics in public economics through reading the textbook by turns or surveys on research papers. In the seminar, research instruction is performed focusing on the followings: (1) building economic models based on economic theory, (2) empirical investigation of the models, (3) writing original research papers, (4) research presentation in academic conferences.

●Research Interests

General Research Area: Entrepreneurial Finance, Corporate Finance, Behavioral Finance. Specific Research Area: Initial Public Offerings, Venture Capital, Investor Sentiment, Return Predictability.

(My work involves empirical analyses.)

●Outline of Seminar for Graduate Students

The objective of the seminar is to learn how to read academic papers and to encourage students to explore ‘interesting’ research questions in finance. I expect that you read and discuss a number of important literatures in empirical finance (e.g., *Journal of Finance*, *Journal of Financial Economics*, *Review of Financial Studies*, etc.). In addition, you need to learn the usage of statistical software. The grade will be based on seminar participation and paper presentations.

●Profile

Since October 2017: Associate Professor at Graduate School of Economics, Nagoya University

2016–September 2017: Lecturer at Graduate School of Economics, Nagoya University

2015–2016: Researcher at Kobe University

2012–2015: Kobe University, Ph.D. in Commerce

2010–2012: Kobe University, M.A. in Commerce

●Publications

●Research Interests

- Explaining consumer behavior and states of mind behind the behavior with quantitative approaches (statistical models, machine learning, etc.)
- Establishing methodologies to retrieve information from unstructured data such as photos, sentences, etc. for marketing decision-making and explaining consumer behavior.

●Outline of Seminar for Graduate Students

Students will learn basic knowledge about marketing science and how to conduct original research by reading textbooks and papers in the prestige journals in the marketing field. Not only that, but also to have the experiences of empirical analysis with the business data, students will participate in the data analytics competitions (outside activities). All students are expected (1) to present your original research and (2) to contribute to the in-seminar discussion proactively.
